Bridging Manufacturing Solution Towards NET ZERO CARBON

Because the more efficient in production, it will reduce the use of carbon dioxide to less. By the main steps causing carbon emissions - either from direct energy use in production or from side effects in the production chain. In order to increase the efficiency of the production line to be efficient. To reduce waste in the production process would have an effect on both competitiveness and long-term sustainability.

INTERMACH

ASEAN'S LEADING ADVANCED INDUSTRIAL MACHINERY AND SUBCONTRACTING EXHIBITION

The 40th INTERMACH

The ASEAN's Leading International Industrial Machinery and Subcontracting Exhibition, presents the integration of advanced technology solutions in manufacturing processes across the value chain.
